

Resolution on Peace-disturbing role of USA in Pakistan

The EC meeting of WPC strongly condemns the Anti-people role being played by USA in Pakistan. Imperialism has adapted hostile policy of creating war hysteria after tilt of world power balance in 1991 in favour of war mongering imperialist forces headed by USA. This policy is being continuously followed.

Iraq and Afghanistan have been occupied in the name of so- called war against terrorism. Pakistan is rapidly becoming the next target. Imperialism's own creatures, the Taliban, have created an atmosphere of terror across the Pakistan. This situation is being utilized as a justification for American open and covert activities of destabilizing the area.

Drone attacks deep inside Pakistan are being carried out. US Embassy and Consulates in Islamabad, Karachi and Peshawar are being converted into military complexes. Private armies like Black Water and XE are openly working in Pakistan under American Patronage. This meeting of WPC demands that Pakistan's independence and sovereignty should fully be respected. It demands immediate evacuation of bases and withdrawal of regular and private military forces from Pakistani soil and cessation of Drone attacks
